I think it is in many of these presentations. Thank you!! I think it is a little different than Bruce's recall but it is easier to understand looking at the docs & graphs.

Thanks everyone,
Erin

Hi Erin,
Here is the link to Appendix II from the Board's website, where it shows everything TBI submitted for the 2006 plan.

http://www.waterboards.ca.gov/waterrights/water_issues/programs/bay_delta/wq_control_plans/2006

wqcp/app2_refdocs.shtml#bay

Perhaps it is one of these?

Ali

Thanks Gary,

Good to know it is a TBI product and that it is out there somewhere. I'll keep looking on State Board site. Thanks for responding on vacation and sorry to bug you on vacation!

Erin,

The TBI analysis was submitted in the mid-2000s during the WQCP review that led to adoption of the 2006 Plan. I am on vacation and will find it when I return next week. It is also probably posted on the Board's website although you'll have to dig a bit to find where...

Cheers,

Gary

Subject: Request for 2006 TBI analysis of Roe Island Trigger & Standard

Hi Allison and Gary,

I spoke with John earlier this week when he responded to a message I sent him about a 2006 TBI analysis (or submittal to the State Water Board) which has information about the Roe Island standard and trigger (part of the 2006 WQCP Delta outflow objective). Bruce Herbold has mentioned this analysis and his recollection is that the information TBI submitted suggested that water has been managed to avoid triggering the Roe Island standard. I've not seen the analysis and can't seem to find it. I've googled away and have found a 1993-ish TBI document (from Gary I think) that describes concern about the Roe Island trigger in comments that were submitted as part of the EPA WQS promulgation that resulted in the X2 standard and the 1995 WQCP update. Those comments are prior to the X2/Delta outflow objective being in place. I don't even know for sure if it is a TBI analysis or set of comments to the State Board. If that document does exist, it would be helpful for me to understand it.

If either of you know of or where this analysis/comment package is and can share it with me, I would be very appreciative. I apologize for the vague description -- please let me know if more information will help you know whether or not it is something TBI worked on and I'll ask Bruce to try and recall more from his memory banks.

Thanks,

Erin
